Feast of abundance of Gangjin sea and freshly caught raw fish

With the deep concave of Gangjinman Bay leading to a series of islands including Gogeu Island and Wando Island in the landscape of Gangjin, it has an abundance of various fish species all year round as the source of fisheries products. As such, fish is fresh and the flesh is firm because of large sea level change.

To taste raw fish of Gangjin recognized by Namdo's gourmets, come to Maryang Port and get the taste of it.

Clams

Fish Skin

Sea Cucumber, Abalone
